AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application. Please amend the following claims:

Listing of Claims:

- I. (Currently Amended) An in-vivo device comprising: a substantially spherical housing, said housing comprising a sensor; and a detachable appendage.
- 2. (Original) The device according to claim 1 wherein the sensor is an imager.
- (Original) The device according to claim 2 wherein the imager is a CMOS imager.
- 4. (Original) The device according to claim 1 wherein the housing includes a viewing window.
- 5. (Original) The device according to claim 1 wherein the appendage includes a degradable material.
- 6. (Original) The device according to claim 5 wherein the degradable material is pH sensitive.
- 7. (Original) The device according to claim 1 wherein the appendage and the spherical housing are glued together.
- 8. (Original) The device according to claim 1 wherein the appendage and the spherical housing are glued together using dissolvable glue.
- 9. (Original) The device according to claim 1 wherein the appendage comprises: an outer coating; and an internal filling.
- (Original) The device according to claim 9 wherein the outer coating is semipermeable.
- 11. (Original) An ingestible imaging device comprising: a substantially spherical imaging device; and a detachable appendage.

- (Original) The device according to claim 11 comprising: 12, an illumination source; and a transmitter.
- 13. (Original) The device according to claim 12 wherein the illumination source has intensity that is adjustable in vivo.
- (Original) The device according to claim 11 comprising a ballast weight. 14.
- (Original) The device according to claim 11 wherein the appendage includes a degradable material.
- (Original) The device according to claim 15 wherein the degradable material is pH sensitive.
- (Original) The device according to claim 11 wherein the appendage and the spherical housing are glued together.
- 18. (Original) The device according to claim I l the appendage and the spherical housing are glued together with dissolvable glue.
- (Original) The device according to claim 11 wherein the appendage comprises; an outer coating; and an internal filling.
- 20. (Original) The device according to claim 19 wherein the outer coating is semipermeable.
- 21. (Withdrawn) A method for in vivo sensing, the method comprising: causing detachment of an appendage of a sensing device in vivo.
- 22. (Withdrawn) The method according to claim 21 wherein the sensing device is substantially spherical.
- 23. (Withdrawn) The method according to claim 21 comprising: orienting the sensing device along a body lumen wall.
- 24. (Withdrawn) The method according to claim 21 comprising: triggering detachment of the appendage.
- 25. (Withdrawn) The method according to claim 21 wherein detachment is triggered by intake of a cold drink.
- 26. (Withdrawn) The method according to claim 21 wherein detachment is trigged by exposure to a specified pH environment.

- 27. (Withdrawn) A method according to claim 21 wherein the sensing device is an imaging device.
- 28. (Withdrawn) A method for viewing the upper GI tract, the method comprising: inserting an ingestible imaging device, the device comprising a substantially spherical section and a detachable appendage; and detaching the appendage.
- 29. (Withdrawn) The method according to claim 28 comprising: detaching the appendage near entrance to a stomach.
- 30. (Withdrawn) The method according to claim 28 comprising: orienting the in-vivo device along an esophageal wall.
- 31. (Withdrawn) The method according to claim 28 comprising: triggering detachment of the appendage.
- 32. (Withdrawn) The method according to claim 28 wherein detachment is triggered by the intake of a hot drink.
- 33. (Withdrawn) The method according to claim 28 wherein detachment is triggered by an elapsed time period.
- 34. (Withdrawn) The method according to claim 28 wherein the detachment is externally controlled.
